## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Species A in the reply filed on 01/11/2006 is acknowledged. The traversal is on the ground(s) that Species A, B, and C are all directed towards a means for opening a sealed container and are not patentably distinct. This is not found persuasive because although the species related as opening means, the opening function is physically performed in a substantially dissimilar manner for each patentably distinct species. The requirement is still deemed proper and is therefore made FINAL.

2. Claims 3, 4, 6, 7, 11, and 12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 01/11/2006.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

Art Unit: 3736

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10/670,961. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending application merely recites an obvious more specific rendition of the broader claims. Specifically, an elongated tubular housing comprising a container is considered hollow and obviously capable of collecting liquid in order to release it.

5. Claims 1-2 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 16 of copending Application No.

Art Unit: 3736

10/657,682. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending application merely recites an obvious more specific rendition of the broader claims.

6. Claims 1-2, 5-6, and 9-10 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 4, and 6 of copending Application No. 10/661,995. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending application merely recites an obvious more specific rendition of the broader claims.

These are provisional obviousness-type double patenting rejections because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Coleman et al (5065768). Coleman et al discloses a specimen collection and release device comprising a hollow elongate tube 10 having an open end 14 and sealed end 12

Art Unit: 3736

with an opening means 72 allowing air to enter (column 10 lines 39-49) and having a viscous fluid 40 for sealing collected specimen as best seen in Figures 1, 3, 4, and 7.

9. Claims 1, 2, 5, 6, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Koll et al (5129402). Koll et al discloses a specimen collection and release device comprising a hollow elongate tube 12 having an open end 14 and sealed end 16 with an opening means, a score line 44, allowing air to enter and having a viscous fluid 36 such as silicone (column 8 lines 39-41) for sealing collected specimen.
